## Education

### UNIVERSITY OF LOUISVILLE

MEng Computer Engineering & Computer Science, Certificate of Cyber Security

May 2020

Dean's List '20

### UNIVERSITY OF LOUISVILLE

B.S. Computer Engineering & Computer Science

May 2019

Dean's List '15, '16, '19

### COMPTIA SECURITY+ CERTIFICATION

June 2020

## Skills

**Programming:** PowerShell, Python, RESTful API, Java, JavaScript, C, C++, C#, SQL

**Operating Systems:** Windows, Linux (Ubuntu, Debian, Kali), VirtualBox, VMWare

**Tools:** Tanium, Git, GitHub, Postman, Docker, Jenkins, Jira, Kubernetes, AWS, Confluence

## Personal Projects

### Secure Cloud File Storage System

- Virtual server based application that splits, encrypts, rebuilds and stores a given plaintext file encrypting each split segment with a unique algorithm
- Utilized Python, Socket (TCP/IP) Programming, VirtualBox and SHA256, AES-128 and RSA encryption algorithms

### Consolidate

- Web Application that gathers and delivers specified information from Twitch, YouTube, and various news websites on a single webpage
- Utilized Python, Flask, JavaScript, React, HTML/CSS, Restful API, Postman, Git, Docker, and AWS

### Custom DevOps Pipeline

- Researched, deployed, and maintained a custom CI/CD pipeline for the Consolidate personal project
- Utilized Git, GitHub, Jenkins, Docker, and AWS

## Experience

### SNAP-ON INCORPORATED

Kenosha, WI

### Programmer / Analyst I

November 2020 – Present

- Engineered an enterprise-wide automated system to create, deliver, audit, and manage 5,000 local administrative account credentials with supporting technical and end-user documentation
- Initiated and developed an internal automated incident response web application utilizing business critical third-party APIs with supporting in-depth documentation and user guides
- Interfaced with various internal tools to develop and maintain end-to-end automated deliverables, addressing numerous core business requirements
- Promptly adjusted existing skillset to accommodate the specialized requirements of the asset management tool, Tanium
- Leveraged Tanium to reliably administer asset management solutions to 15,000 machines globally
- Regularly connected with Tanium account managers to ensure business continuity and discuss future Tanium product service enhancements
- Inquisitively researched and actively applied modern technologies to diversify existing skillset, deliver sustainable outcomes and elevate existing systems
- Deployed, administered, and managed a 6,000-user Franchisee Tanium ecosystem

**LEEWARD BUSINESS ADVISORS****Kenosha, WI****Firewall Co-op****July – August 2018**
